

UPCOMING ENGINEERING CONTRACTING CO.

COMPANY PROFILE

THE LEADING PROVIDES QUALIFIED CONSULTING PERSONNEL TO THE OIL, GAS, PETROCHEMICAL, INFRASTRUCTURE AND POWER INDUSTRIES SECTOR

UEC was formed in **Saudi Arabia in 2015** and has its global headquarters in Al Khobar, registered with

CR # (Main CR no: 1112100062, Branch CR No: 2051162996).

Our current business activities include professional services related to Civil, HVAC & Electromechanical, Electrical, Fire Protection, Piping, Plumbing, Structural, Painting and coating, Industrial Maintenance, Supply chain, and logistics, including heavy equipment rental services.

WHO WE ARE

OVERVIEW

UEC The ownership and management of **Upcoming Engineering Contracting**, hereafter referred to as UEC, provide qualified consulting personnel to the Oil, Gas, Petrochemical, infrastructure, and power Industries sectors.

UEC is pleased to provide the industry with highly qualified consulting personnel dedicated to Contracting Management, Materials Engineering, Welding Engineering, Project Management, Materials Application and Design, Quality Engineering, Quality Assurance/Quality Control and all types of equipment services.

UEC was formed in Saudi Arabia in 2015 and its global headquarters is in Al Khobar, registered with **CR # (Main CR no: 1112100062, Branch CR No: 2051162996).**

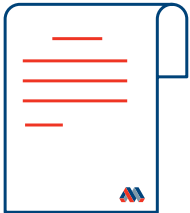

UEC holds approved **vendor status (10061818) with Saudi Aramco** and delivers technical expertise to diverse clients across Saudi Arabia and is focused on providing services also in Gulf Coast Countries & the Middle East.

Our current business activities include professional services related to Civil, HVAC & Electro-Mechanical, Electrical, Fire Protection, Piping, Plumbing, Structural, Painting & Coating, Industrial Maintenance, Supply chain & Logistics include heavy equipment rental services.

Company's Strategy

- ✓ Expansion of the product portfolio.
- ✓ Persistent efforts to increase the company's market share.
- ✓ Targeting specific customer segments.
- ✓ Strengthening relationships with current vendors/suppliers & simultaneously developing new vendors/suppliers.
- ✓ Enhancement of Systems and Inventory management.

OUR MISSION

Synergizing teamwork, technology, performance, safety, and innovation to deliver exceptional customer satisfaction

OUR VISION

"Expand globally, delivering exceptional services that drive unique client value."

OUR HISTORY

High Quality Services

Since 2015

UEC POLICIES

At UEC, we are dedicated to delivering the highest quality of service by providing our clients with the most skilled and qualified professionals in the industry. We place a strong emphasis on the ongoing development and enhancement of our team's qualifications. Our commitment to excellence drives us to offer efficient, reliable, and expert consulting services, always prioritizing total customer satisfaction.

UEC is committed to collaborating closely with clients to deliver customized solutions that align precisely with their project objectives and requirements. By emphasizing meticulous planning and execution, we ensure the highest standards of quality while proactively mitigating risks and minimizing cost overruns. Our operations are governed by a fully integrated management system, independently verified to meet the rigorous standards of ISO 9001 (Quality Management System), underscoring our dedication to excellence and continuous improvement.

OUR POLICY FRAMEWORK ENCOMPASSED THE FOLLOWING KEY PRINCIPLES:

- Compliance with all relevant laws, regulations, industry standards, and best practices is strictly adhered to.
- UEC commits to developing, implementing, and sustaining a metrics-driven IMS framework, ensuring progressive enhancement
- Our team pledges dedicated service to clients, delivering projects with excellence while embracing corporate social responsibility and sustainable development.
- We commit to maintaining exceptional HSE standards, minimizing risks, and promoting a safe, healthy, and sustainable work environment. We believe that UEC represents reliability and assurance, reflecting our dedication to delivering exceptional customer experiences.
- UEC expects all employees to perform duties safely and responsibly while committing to provide comprehensive protective measures. In exchange for employees' diligent efforts, UEC pledges to provide essential safety resources and foster open communication.

"We periodically assess and update this policy, ensuring awareness and understanding among employees, contractors, and interested parties."

Date: 01/01/2025

M.Dogashim bin Dogesham
Chief Executive Officer

Upcoming Engineering Contracting Co.

SERVICES

Based on the diversity and technical expertise of our staff, the following is an overview of services offered by Upcoming Engineering Contracting Company:

1. Technical Inspection Services
2. Heavy Equipment Rentals & Maintenance Services
3. Contracting (Civil, Mechanical, E&I)

1. Technical Inspection Services

- Quality Personnel's
- QHSE Personnel's
- Project Supervision (E&I, Mechanical, Civil, HVAC, Firefighting & UG/AG piping)
- In-Service Inspection
- Technical Auditing / Supplier Assessments

2. Heavy Equipment Rentals & Maintenances Services

- **Crane rental** (Mobile cranes, tower cranes, crawler cranes)
- **Excavator rental** (Backhoes, mini excavators, long reach excavator)
- **Road rollers rental** (Vibratory rollers, pneumatic rollers, single drum rollers)
- **Forklift rental** (Heavy forklift, counterbalance forklift, telescopic forklifts)
- **Drum Truck** (Rear dump truck, articulated dump truck, tailgate dump truck)

3. Contracting (Civil, Mechanical, Electrical, Instrumentation & Telecommunication)

1. Civil Division

UEC General Construction Division boasts an impressive track record of delivering high-quality services punctually and at competitive rates, cementing its position as an industry leader. With a proven commitment to innovation and excellence, UEC consistently delivers successful projects, earning a reputation as a trusted construction partner. We undertake a variety of projects for a wide range of valued clients - from small private developments to large Government projects.

Our civil engineering expertise encompasses comprehensive service solutions, including

- Construction of Infrastructure Development Projects
- Power Plants & Substations
- Structures Required for Oil & Gas Industries

Our core expertise and proficiency are in the areas of

- Site grading
- Excavation & Backfilling
- PCC, Reinforcement & Formworks
- Concrete Works
- RCC/ Brick Drainworks
- Finishing work

Our Civil Turnkey Projects division is spearheaded by experienced Project Managers and supported by skilled professionals, offering comprehensive Construction, Project Management, and Maintenance services.

3. Contracting (Civil, Mechanical, Electrical, Instrumentation & Telecommunication)

2. Mechanical Division

UEC mechanical services consist of Plumbing, Piping, HVAC, Welding, Coating & Painting, Specialized fire protection services, and Industrial maintenance in addition to fabrication and installation of process pipelines and equipment.

Our core expertise and proficiency are in the areas of:

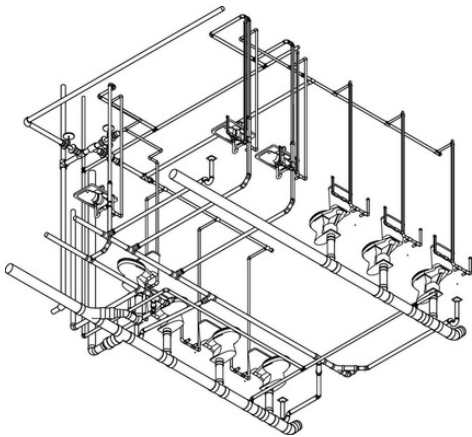

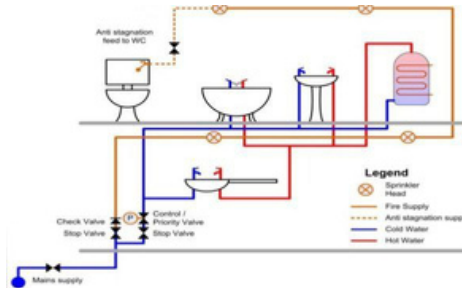

- Installation and testing of Plumbing work in Buildings.
- Installation and testing of UG/AG Nonmetallic piping.
- HVAC duct fabrication, installation, air balancing, testing, and commissioning.
- Specialized Fire Safety Solutions: Sprinkler Systems, Hydrants, and Extinguishers installation.
- Process/Power piping fabrication, Welding erection, and testing.
- Protective Coatings and Painting for Industrial and Civil Infrastructure.

UEC delivers a comprehensive range of services and solutions across multiple sectors, including Power, Oil & Gas, General Industries, and Infrastructure Projects. Our operations are conducted in strict adherence to SAUDI ARAMCO standards, as well as internationally recognized codes and regulations, ensuring the highest level of quality, compliance, and reliability in every project we undertake.

I. Installation and testing of Plumbing work in Building

- PVC pipe installation for drainage network in the building.
- CPVC pipe installation for hot and cold water supply in buildings.
- Plumbing fixtures installation and testing.
- Hydro-testing for the installed piping.
- Functional test for the installed plumbing fixtures.
- Disinfection for the installed potable water pipes.

II. Installation and testing of UG/AG Non metallic Piping

- Excavation of trench for pipe laying.
- RTR (GRE, GRP, GRV) pipe laying and Installation as per approved procedure and manufacturer recommendation.
- Installation of High-Density Polyethylene Pipe (HDPE).HDPE pipe joints (Butt fusion, Electrofusion, Flange connection & Mechanical joints).
- UPVC pipe laying and installation (rubber ring joints).
- GRP Manhole and catch basin installation.
- Gravity test for the installed manhole and pipes.
- Deflection test for the installed pipes.
- Thrust Block installation for pressure piping.
- Hydrotest for the installed underground pressure pipes.

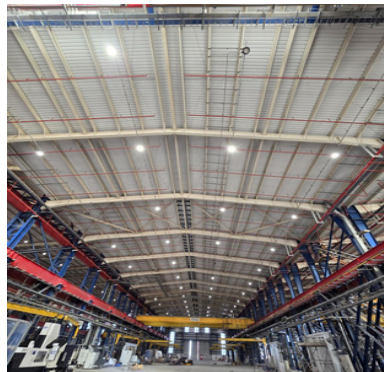

III. HVAC Duct Fabrication, Installation, Air Balancing, testing and commissioning

- HVAC duct fabrication, installation, insulation, and cladding work.
- Motorized Fire Smoke Damper, Fire Damper, Combination Fire Smoke Damper Installation, and functional testing.
- Variable Air Volume, Constant Air Volume, Duct Heater Installations.
- Wall Mounted, Floor Mounted, Roof Mounted Exhaust Fan Installation.
- HVAC Equipment Including AHU, ACCU, and Chiller Units Installation.
- Installation of Copper tube and copper piping including their Pressure testing and vacuum testing.
- Installation of Grills, Diffusers, Exhaust Air Louvers, and Fresh air Sand Trap louvers.
- Installation of DX Split Units, Ceiling suspended DX Split Units, Fan Coil Units DX Type, and Chilled Water FCU units installation.

IV. Specialized Fire Safety Solutions: Sprinkler Systems, Hydrants, and Extinguishers Installation

- Fire fighting pipe laying and installation.
- Sprinkler head installation and testing.
- Sprinkler system valve installation (shut off valves, zone control valves).
- Fire fighting system pump installation.
- Fire Alarm assembly installation.
- Fire department connection installation.
- Fire fighting system flushing and testing.
- Fire Hydrant and Post Indicator valves installation and testing.
- Fire Extinguisher installation.

V. Process/Power Piping fabrication, Welding Erection and Testing

- Pipe fabrication and spool preparation.
- Internal cleaning of pipes before installation.
- Process/Power piping Erection.
- Hydro-testing of installed process piping.
- Piping lay-up after testing.

VI. Protective Coatings and Painting For Industrial and Civil Infrastructure

- Coating application for industrial plants and equipments.
- Internal and External coating for the pipelines and piping.
- Protective coating for industrial concrete structure.
- Viscoelastic protective coating for the buried services.
- Perform testing (holiday, chloride, abrasive test).

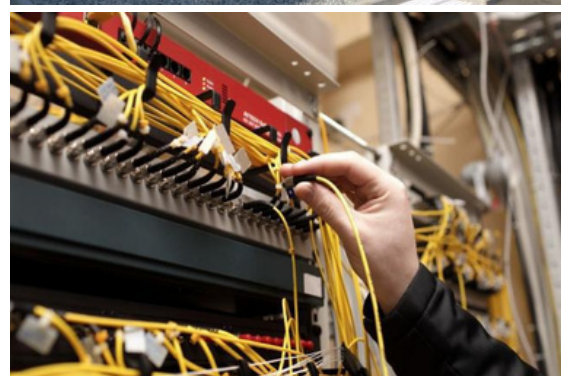

3. Electrical, Instrumentation & Telecommunication Divison:

UEC through its Electrical Projects department provides a portfolio of services in all phases of Electrical, Instrument and Telecommunication Construction activities. Our staff is continuously educated and familiar with NEC/ IEC / IEEE / BS / NEMA standards.

3.1 Electrical, Instrumentation

Our Expertise & Proficiency are in the areas of,

- Design, supply, and installation of comprehensive cabling solutions, including cable trays, trunking systems, and conduits.
- Design, supply, installation, testing and commissioning of low-voltage (LV) and medium-voltage (MV) electrical infrastructure.
- Comprehensive electrical and instrumentation services, including excavation, cable laying, cable management, and power distribution systems.
- High-Voltage Cable Termination and Jointing Services (up to 33kV and 36kV) and Industrial Automation Solutions.
- Turnkey Solutions: Integration, Installation, Commissioning and Start-up Services.
- Expert Transformer Revamping: Oil Filtration, Repair, and Maintenance for 400 MVA Transformers.
- Low voltage power panel installation and pre-commissioning.
- Instrument transmitter, gauges installation and testing.
- Fire Alarm and Gas detection system installation, testing, and pre-commissioning.

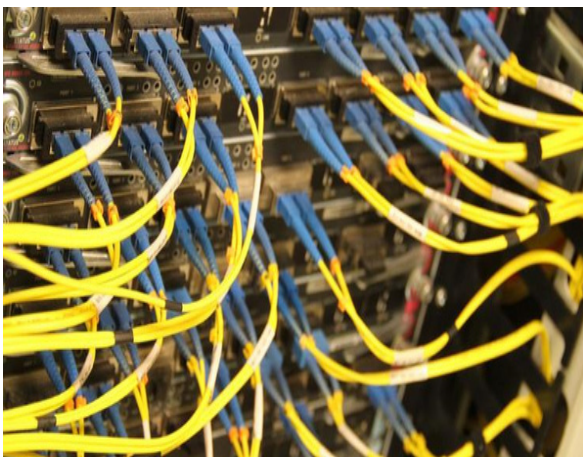

3. Electrical, Instrumentation & Telecommunication Division:

UEC through its Electrical Projects department provides a portfolio of services in all phases of Electrical, Instrumentation and Telecommunication Construction activities. Our staff is continuously educated and familiar with NEC/ IEC / IEEE / BS / NEMA standards.

3.2 Telecommunication

Our Expertise & Proficiency are in the areas of:

- Design, supply, and installation of comprehensive cabling solutions, including cable trays, trunking systems, and conduits.
- Comprehensive telecommunication services, including excavation, cable laying, cable management, and duct bank installation.
- High density drilling and sleeve installation for fiber optic cables.
- Mandrel test for the installed sleeve and duct banks.
- Sub-duct installation for the telecommunication cabling system.
- Fiber optic cable splicing and testing.
- Service post indicator markers installation.
- Telecommunication cabinet installation, cabling connection, and pre-commissioning.
- Speakers and beacon installation and testing for telecommunication.

OUR

Empowering

Client Growth

since 2015

Over the years UEC, has established lasting relationships with international and national oil companies, engineering contractors as well as major international companies in related sectors.

CLIENTS INCLUDE:

1	SAUDI ARAMCO	 ارامكو السعودية Saudi Aramco
2	SINOPEC ENGINEERING GROUP SAUDI CO. LTD	 SINOPEC
3	SEPCO ARABIA COMPANY	 SEPCO 山东电建

UEC PROJECTS

OUR MAJOR ONGOING PROJECTS

- Construction

1. Below listed are some ongoing construction projects:

Project Name		Client	End User	Location
1	Installation of Fire Protection System in ARAMCO - Haradh Security Complex	GCS	Aramco	Haradh
2	Installation of Fire Protection System in ARAMCO - Khurais Security Complex	GCS	Aramco	Khurais
3	Installation of Fire Protection System in ARAMCO - Safaniyah Security Complex	GCS	Aramco	Safaniyah
4	Installation of Fire Protection System and RTR Work in ARAMCO - Hawtah Security Complex	GCS	Aramco	Hawtah
5	FOC Cable and Associated Materials, Installation Works-Zuluf Project	KIC	Aramco	Zuluf / Safaniyah
6	Construction of Hussein plaza (Complete Gray structure and finishing work)	ASH	ASH	Al Khobar

Overview of the Commercial Complex Project

This project involves the construction of a modern three-story commercial complex with a rooftop, covering a total built-up area of approximately 4,000 square meters. The structure will be developed as a skeleton (shell and core) building, with partial finishing work to meet the essential requirements for commercial leasing.

The complex is designed to accommodate a wide range of commercial activities, including retail outlets, offices, and recreational spaces, ensuring flexibility and adaptability for prospective tenants. The strategic design of the rooftop will allow for potential future use, such as a café, lounge, or other leisure facilities.

Key highlights of the project:

- Total Built-Up Area: Approximately 4,000 square meters.
- Floors: Three main levels with a rooftop area.
- Construction Type: Shell and core structure with selective finishing.
- Purpose: Suitable for commercial and business activities.

This development aims to provide a high-quality, versatile commercial space that meets the growing demands of modern businesses and consumers.

Shaping the future with innovative upcoming engineering contracts

UEC PROJECTS

OUR MAJOR ONGOING PROJECTS

- Technical Inspection Services

2. Below listed are some ongoing Projects of supply of Manpower in Quality Inspection Department:

	Project Name	Client	End User	Location
1	East West Pipeline Project (EWPS)	Sinopec / SEG	Aramco	Pump stations 1-11
2	Master Gas System 3 MGS-3	Sinopec / IPS	Aramco	Pump stations 6-10
3	Upgradation of fire protection & Industrial Drainage System Phase II	NESMA Projects	Aramco	Jeddah Madinah Yanbu
4	King Salman International Complex For Maritime Industries and Services (MYDP)	Sepco Arabia	Aramco / IMI	Ras-Al-Khair
5	CS Technical Support Department Inspection and Quality Assurance Section.	TUV / FAHSS	Aramco	Dammam
6	Dammam, Khobar and Safwa Aramco Boys and girls Schools	Al Falak	Aramco	Dammam, Khobar and Safwa
7	Debottleneck Onshore Plant Safaniya	ARCC / ENPPI	Aramco	Safaniya
8	Refrigeration Units & Storage Tanks at JU'AYMAH	Heisco / ENPPI	Aramco	RAS TANIA
